- ▶ Provided consulting services to over 600 different organizations across the United States and abroad

PERIMETER E-SECURITY CONSULTING SERVICES OVERVIEW

Perimeter E-Security has been in the business of providing professional security services for over 10 years and has a fully staffed team of security professionals and practitioners ready to serve and assist you in meeting your security needs. Perimeter’s Consulting Services will help your organization assess your current risks, identify potential threats, ensure compliance with security standards, and ensure that safeguards have been properly implemented. Perimeter’s Security Consultants maintain several certifications including Certified Information Systems Security Professional (CISSP) and Certified Information Systems Auditor (CISA). Our consulting team leverages industry leading experience and expertise and acts as a trusted security resource for your organization by assisting your institution with assessing security, managing risk, and meeting regulatory compliance needs.

While our services can be beneficial for any industry, we specialize in the financial, government, technology, and healthcare markets. Our Consulting Services can be designed to meet your organization’s unique security needs since each service we offer is adaptable to your business based on the size and complexity of your organization. Perimeter consultants are trained and certified on the latest industry standard tools, technologies, and methodologies to ensure the highest level of service. In addition, our Security Consultants have over 60 years of combined experience working in the information and network security industry and utilize that experience and knowledge to ensure your security needs and expectations are met.

PERIMETER’S CONSULTING SERVICES

Service	Description
Security Assessment	Perimeter consultants will test, analyze, and evaluate the overall integrity of the network and critical information technology assets to uncover and identify potential security weaknesses along with recommendations for risk mitigation
Information Risk Assessment	Perimeter consultants will identify and measure all known risk affecting the organization’s information through the analysis and prioritization of information assets, threats, and existing controls and safeguards
IT Controls Audit	Perimeter consultants will ensure compliance with the appropriate security standards and ensure that IT related controls and safeguards have been properly and effectively implemented
Penetration Test	An external “real world” test on a network that mimics hacker methods to identify potential weaknesses that would allow someone to gain entry into the network
